

Tauhidur Rahman *SQA Engineer*

tauhidurr102@gmail.com 01778804396 tauhidurr tauhid102 Portfolio

PROFILE

SQA Engineer with solid experience in ensuring software quality across web and mobile platforms. Skilled in designing and executing comprehensive test strategies, including functional, nonfunctional, regression, and integration testing. Strong understanding of API validation, UI behavior, and performance considerations.
Experienced in test planning, defect tracking, and data validation, with a focus on delivering reliable and user friendly applications.

WORK EXPERIENCE

Software Engineer (SQA) Oct 2026 – Present
Appinion BD Limited Dhaka, Bangladesh

- Analyze BRDs and functional specifications to identify testable requirements and quality risks.
- Develop test plans, test scenarios, and test cases with traceable requirements coverage.
- Execute functional, regression, smoke, and integration test suites.
- Develop and maintain Selenium WebDriver automation scripts using Java.
- Log, classify, track, and retest defects throughout the defect lifecycle.
- Perform defect verification and regression testing after bug fixes.
- Collaborate with developers and product owners on requirement clarification and defect triage.
- Analyze test execution results, report defect metrics, and improve test coverage.

SQA Engineer Nov 2025 – Oct 2026
RedDot Digital Limited Gulshan 1, Dhaka

Responsibilities:

- Designed and executed detailed manual test cases based on BRD and Figma requirements for the fintech application.
- Performed API testing using Postman, including request validation, response verification, and status code validation.
- Created and maintained test scenarios, test cases, and test reports in Excel.
- Conducted regression testing, smoke testing, and provided UAT support before production release.
- Conducted USSD testing for MFS applications, ensuring seamless functionality across different user flows and network conditions.
- Validated backend data by performing database (DB) testing, ensuring data integrity and consistency between UI, API, and database.
- Performed end-to-end testing of fintech workflows in *MFS (LENDEN)*, including wallet, merchant, and transaction modules.

QA Engineer May 2025 – Nov 2025
Easy Automation Lab Newark, USA

Responsibilities:

- Automated UI testing using Selenium and Cucumber, enhancing regression coverage.
- Managed test cases via Zephyr and tracked bugs through Jira.
- Collaborated with developers to resolve issues and improve release quality.
- Validated backend data using SQL for end-to-end testing.
- Wrote detailed test cases with individual steps and corresponding expected results, making them easy to convert into automation scripts.

Associate SQA Engineer Jan 2023 – Apr 2025
Nascenia Dhaka, Bangladesh

Responsibilities:

- Executed comprehensive manual testing for Android fintech applications and web platforms, with hands-on experience in the *POCKET* app.
- Developed and executed API test scenarios using Postman, while preparing clear and structured release documentation.
- Collaborated closely with developers, product teams, and stakeholders to identify and resolve high-priority defects efficiently.
- Ensured the delivery of stable, high-quality, and client-ready software through rigorous testing and validation processes.

PERSONAL PROJECTS

Transactional API Testing

- Designed and executed **API test cases** for a **financial transaction system** involving agents and customers.
- Automated testing using **Postman** and report generation via **Newman**, reducing manual test effort by **40%**.

Test Cases
Newman Report
Postman Doc

Daraz UI & Search Testing

- Conducted **manual UI and functionality testing** for the **Daraz homepage & search**.
- Created **test plans, test cases, and mind maps** for structured test coverage.

Tool Use:

- Excel Sheet
- Xmind

OrangeHRM Test Automation Framework

- Selenium WebDriver, Java, Cucumber BDD, POM
- Automated 48+ UI test scenarios
- Login, User Management, Job Configuration
- Reusable utilities and dynamic test data
- Extent HTML/PDF reporting and logging
- Automated screenshot capture
- Tag-based test execution
- Headless browser execution
- Cross-browser testing

Tech Stack: Java, Selenium, Cucumber, JUnit, Maven, POM, Log4j2, Extent Reports.
GitHub: Repo

SKILLS

Automation
Automated Testing | Regression & Performance Testing | API Testing (Postman, Newman) | Selenium | Cypress | JMeter | Load Testing | Test Automation Frameworks (POM, Data-Driven, BDD)

Manual Testing
Manual Testing | Test Case Writing | Test Scenario Design | Test Execution | Exploratory Testing | Smoke & Sanity Testing | Cross-Browser Testing

Programming & Frontend
JavaScript | Java | React.js | Redux | HTML, CSS

Platforms & Tools
Jira | Trello | Excel | Notion | Zephyr | Xmind | Chrome DevTools | Figma

EDUCATION

B.Sc in Computer Science and Engineering
United International University
2017 – 2022 | Dhaka, Bangladesh
